

DONNINGTON PARTNERSHIP ENVIRONMENTAL POLICY

The Donnington Partnership is committed to minimising the environmental impact of the organisation and to the improvement of the local, national and global environment in any way that it can.

The Donnington Partnership is primarily concerned with the improvement of the quality of life in the Donnington area. Although The Partnership has no statutory duties in this field it would seek to encourage the following in the Donnington area:-

- Control and reduction of noise
- Waste avoidance. The Partnership would like to see litter problems tackled and the promotion of recycling reusing etc.
- Education and Awareness raising on environmental issues and would seek to change behaviour through this process.
- Improvement of the local environment and local quality of life.

The Partnership aims to -

- Consult and involve local people on all of its activities and will encourage active involvement of individuals wherever possible.
- Resolve conflict through discussion and consultation.
- Work in Partnership with local people and organisations to improve and protect the environment.
- Continuous improvement will mean that we find ways to measure and continually improve our performance.
